

### REMARKS

This Supplemental Amendment is being submitted for the sole purpose of correcting a typographical error that applicants inadvertently presented in the most recent Amendment which was filed on July 27, 2009 in response to the Office Action of April 27, 2009. This typographical error has just come to applicants' attention.

The typographical error appeared in the final clause of independent claim 18, in which the intended newly-added phrase "wherein the transparent layer comprises convex elevations, the convex elevations tapering in a direction away from the first main surface of the multilayer structure *to* the reflective layer or interface" was mistakenly presented as "wherein the transparent layer comprises convex elevations, the convex elevations tapering in a direction away from the first main surface of the multilayer structure *of* the reflective layer or interface". (The italicized words in the foregoing quotes identify the location of the typographical error; thus, the word "of" was mistakenly substituted for the intended word "to".)

This inadvertent typographical error was also repeated, in quoting or referencing this newly-added phrase in claim 18, in the Remarks section of the Amendment of July 27, 2009 at page 16, line 7, at page 16, line 14, at page 18, line 8, at page 18, line 12, at page 19, line 6 and at page 20, line 11.

Applicants apologize for any inconvenience resulting from this inadvertent error, and ask that the Examiner's further consideration of the pending claims be based, at least with respect to independent claim 18, on the corrected form of claim 18 presented in this Supplemental Amendment.

Early and favorable consideration of the instant application is once more solicited.

It is believed that no fees or charges are required at this time in connection with the present application. However, if any such fees or charges are required at this time, they may be charged to our Patent and Trademark Office Deposit Account No. 03-2412.

Respectfully submitted,  
COHEN PONTANI LIEBERMAN & PAVANE LLP
